## PRODUCTS & INFO

**noise generator.** The original beast. Four CDs. 1875 sound design elements. One package. A motherlode of organically-based real sound design elements, no 're-synthesized synthesizer' crap here, just a huge variety of real sounds grotesquely twisted, dismembered, smacked, & verbally abused. The user-friendly color-coded, four disc set of sonic condiments features one full disc dedicated to each of the four major food groups of sound design: hits, whooshes/transitional elements, noises and drones/beds.

**new!**

**slam•bang•boom.** A two-disc boxed set featuring over 1,200 elements dedicated to the most basic need of sound design: Hits. On these discs, you'll find Crashes, Flashes, Slams, Explosions, Computer/Internet sounds, Rumbles, Stutters, Power-ups, Power-downs, Telemetry, Vinyl Hits, Crushes, Screams, Delayed Hits, Radio Hits -- and that's just a partial list of the over 90 categories of producer-deafening, client-sterilizing and viewer-grabbing sounds.

**new!**

**transitions.** A two-disc boxed set featuring over 1,200 elements that includes -- you got it -- transitional elements, or, as we like to call them: "whooshes". Everything from Fly-Bys to Airy Whooshes, to Scrapes, to Delicate, Tinkly Whooshes, to Guitar Whooshes, to Lasers, to Feedback Whooshes, to Hi-Frequency Sweeps, to Hums, to Vocal Sweeps, to Beams. Overall, 98 categories of transitions just begging to be added to Radio, TV, Film, Multimedia and Internet productions.
